CRISTINA

CRIIT121

Combining industrial production with artisanal craftsmanship, this series embodies the excellence of Made in Italy. The design modernizes the classic styles of the 1920s with elegance, refinement, and the use of materials like marble and stone. The series allows numerous finishes to be paired with various types of marble or stone, offering nearly 50 combinations and thus a wide range of customization options for both classic and contemporary settings. The noble materials and finishes, created through a galvanic process and refined by skilled artisans, ensure high standards of both technical and aesthetic quality. The handles, crafted from solid blocks of marble or stone, define the design with their texture and color. The mixer body is made of brass, with a rectangular spout featuring an aerator for a waterfall flow. The intricate details of the knobs, inspired by crystal and precious stone craftsmanship, along with rosettes that echo traditional wood paneling, complete the sophisticated and luxurious design.
