

INSTALLATION GUIDANCE

EASY painted vertical grab bar wall/floor mounted

B&M SKU: ID12003V-PT Idral code: 12003V-PT

Installation sequence

- 1 Confirm the exact length, orientation and fixing dimensions in the technical specification before marking the wall and floor.
- 2 Fix the bar only to a sound supporting structure suitable for the loads stated in the technical specification.
- 3 Select suitable anchors for the wall and floor construction. Do not assume that wall or floor anchors are supplied.
- 4 Assemble the mounting components as shown in the Idral instructions and secure every fixing point.
- 5 Check stability before use. For folding models, verify free movement and adequate clearance through the complete folding range.

Important

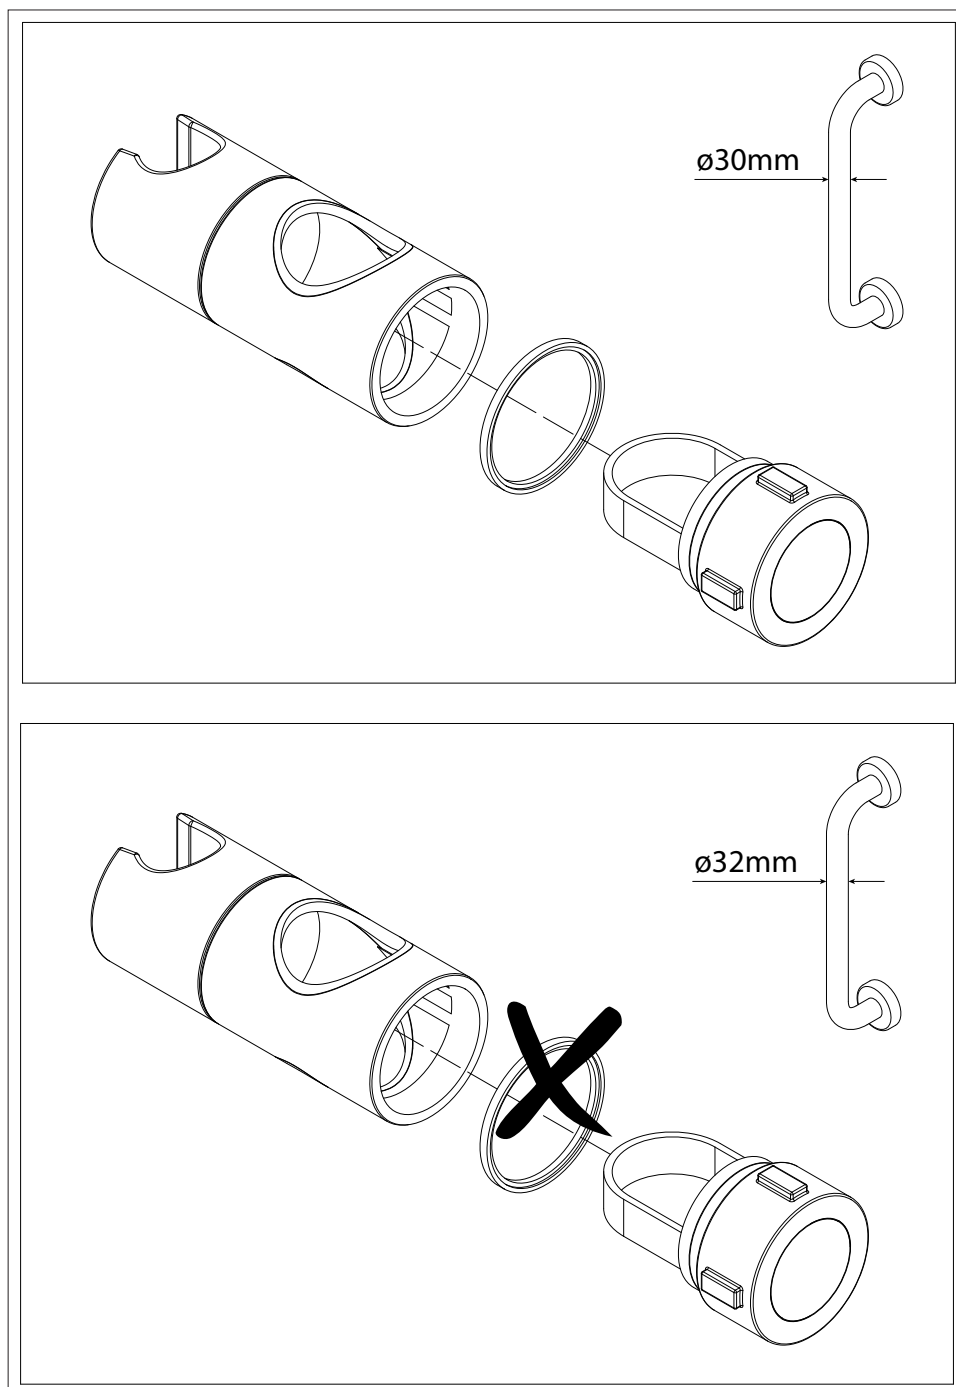

For wall-mounted bars, follow Idral's mounting arrangement for the relevant 30 mm or 32 mm tube system. The model-specific technical sheet remains the dimensional reference.
