

CRISTINA

Care and Maintenance

CRIBA22713 | Blade Series | Matt Black

Routine cleaning

Clean the finished surfaces regularly with a neutral soap-based detergent and a soft cloth, such as microfibre. Rinse thoroughly to remove cleaning residues and dry gently after cleaning.

Protect the finish

Do not use acidic or caustic cleaners, their derivatives, abrasive powders, scouring pads or abrasive metal or non-metal sponges. Do not polish or scrub the finish with an abrasive product. Keep construction chemicals and aggressive cleaners away from the fitting.

Outlet and shower maintenance

If the flow reduces or becomes uneven, have the appropriate aerator, nozzle or supply filter checked using the method in the manufacturer instructions. Use the correct service key and avoid gripping finished surfaces with bare metal tools. Isolate the water before servicing a component.

Leaks and servicing

If a leak develops, isolate the relevant supply and contact a competent plumber or B&M. Quote CRIBA22713 and supply purchase details and photographs. Use the replacement references for CRIBA227 and finish 13 Matt Black.

Finish selection

Matt Black and Alux are different finishes. Screens and printed samples may differ from the actual surface. Confirm the ordered finish using the complete SKU and a physical supplier sample.
